

Every Creating and Patching returns:
if(httpCode != 200 && httpCode != 201)
return (false);

createOrPatchEntities() Sub-Process

boolean createOrPatchEntities(String entity , String json, String iotId)

**[1]. Finding Identical Properties and Patching them.**

1. Sort the Software timestamps in ascending order
2. Get the Software Version at the recent timestamp
3. If this not identical with current firmware version, patch software.version with new timestamp and version.
